Children for a greener earth

Nishant Ratnakar and Ann Correa

The environment support group made 10-15 year-olds walk up to Earth Day - April 22 - better armed with the knowledge of how we are contributing to making the earth a dangerous place to live in through their 'combating climate change' camp. © DNA

Weaving curiosity: Children learn about weavers and their small scale business during a field trip to a weaving mill at Sampangiramanagar. © DNA

Here's to water: Leo Saldanha educates young minds about the water table of Bangalore during a classroom session held at ESG. © DNA

Where's the lake?: Participants are exposed to the reality behind the plight of city lakes during a field trip to the Shettihalli Lake. © DNA

Bring home some knowledge: Young enthusiasts learn about rainwater harvesting at an eco-friendly home on Kanakapura Road. © DNA

Being with nature: Future bikers on the road to a nature-friendly world during a field trip to Raachanamadu off Kanakapura Road. © DNA

What an eye-opener: Little ones being told that snakes only live in anthills, they don't build them. A photo taken during a field trip to Raachanamadu. © DNA

Doing the home work: Children attentively listen to what the owners of an eco friendly house have to say about going green. © DNA

Worth a thought: Children learn about pumping water without using electricity during a field trip to Raachanamadu. © DNA

Loud and clear: A boy gets to experience a sound level measuring device at the Pollution Control Board at Nisarga Bhavan. © DNA
